

ME 120

Due 09/10 November 2016

Solidworks Impeller

Complete a Solidworks drawing of the water pump impeller. Follow the instructions given during class and in the document from Lecture 13.

Each student team should submit 2 files, as shown in the instructions (a SLDPRT file and a STL file) via the D2L dropbox.

To receive full credit, the Solidworks files must be received in the D2L Dropbox before the due date (time deadline is posted via the Dropbox in D2L). Any drawing submitted after the deadline will have a reduced score.
